February 15, 2024

Dear Patient:

You are receiving this letter because you receive Humira from an ARA provider. We want to update you on a possible change to your Humira pharmacy benefit. **If your specialty pharmacy benefit manager is CVS Caremark**, they have mandated that all covered patients change from Humira to a biosimilar medication, Hyrimoz, as of April 1, 2024. Hyrimoz is nearly identical to Humira, and has been approved by the FDA as an equally safe and effective version of Humira. This means that Hyrimoz is expected to work as well as Humira for your autoimmune condition. There is a copay assistance program for Hyrimoz if your costs are significant.

ARA has a team of prior authorization specialists working with us to facilitate this transition. One of our prior authorization specialists will reach out to you soon to confirm the change, help you enroll in the appropriate copay assistance program, and facilitate delivery. It is not necessary to contact us about your mandated change in medications, as we have also received notification from your insurance company. **If your pharmacy benefit manager is NOT CVS CAREMARK, you can disregard this message.** If you have any questions or concerns about the change, please make an office appointment with your provider.

Sincerely,

The Providers of Arthritis and Rheumatism Associates
